The Eyes Have It
A LOCAL SPA OFFERS THE LATEST TECHNOLOGY IN EYELASH EXTENSIONS AND EYEBROW MICROBLADING SERVICES

CHI FARLEY WAS INTRIGUED by an article she read years ago about eyelash extensions and thought it would be a good business to get into. She could not stop thinking about them, so she decided to get her lashes done to see what it was all about. This was seven years ago. It was a very new procedure and she noticed that while working as a flight attendant, the lady passengers did not have their lashes done. Then slowly, every year she started to see more and more women with lash extensions. Now, like getting your nails done, it is a part of a woman’s monthly routine. Women love the confidence having lashes gives them, the ability to wake up looking fresh, and the time saved with the get up and go factor.

Farley is firm about quality standards for eyelash extensions. “There are many technicians out there, so it is important to find someone who is legally licensed, who will not compromise your natural lashes, know how to apply them without causing irritation to your eyes, and to have a clean and sterile environment for you to comfortably relax while getting the procedure done,” she said.

EYELASH EXTENSIONS
After much in-depth research, Farley decided to train with Novalash because of the formaldehyde-free formula, flexibility and durability of the glue, and the great retention. Farley does not use the standard thick, dense lashes that weigh heavy on the lashes, she uses feather-weight lashes that do not compromise your natural lashes. It is not just the lashes or glue, though very important, it has to do with the application, lash artistry, and meticulous work that sets her apart from other lash technicians.

Farley is passionate about delivering the best artistry work to enhance a client’s beauty, as well as to offer a beautiful, clean place to visit. Her attention to detail and desire to enhance your eyes without compromising your natural beauty is her mission.

“I remember the first time I provided our services to a client, the reaction on her face was priceless. I call it the “WOW factor”. The client took one look at herself in the mirror and said, “WOW are those really my eyes? As she said it, she had the sweetest smile. Her reaction warmed my heart, and from there I knew that this line of work was for me.”

“If someone told me five years ago that I would be where I am now, an owner of a spa/boutique, I wouldn’t have believed it. I’ve heard that saying, ‘Do what you love and you will never work a day in your life’, and I can honestly say that that is where I am now.”

and age? "We work with symmetry as much as we can, but keep in mind that your brows are sisters, not twins," Farley says. "It is important to set up a consult appointment before your treatment. Your artist will go over medical history, answer any questions you might have, and discuss your desired shape and size of brows you are looking for."

Your artist should be licensed/certified microblading technician, as well as having a Bloodborne Pathogens certification. Farley takes every precaution to assure her clients are in a safe, sterilized environment. This includes single-use tools and equipment, the use of masks, hair caps, changing gloves frequently, and cleaning all surfaces with a medical cleaning agent is of utmost importance when working with her clients.

FlutterFab Boutique offers more than Eyebrow Microblading and Eyelash Extensions.
